QMAC CONSTRUCTION REFLECTS ON QUARTER CENTURY OF DELIVERING LANDMARK PROJECTS AND LOOKS FORWARD TO A THRIVING FUTURE...

QMAC Construction marks 25 years

QMAC Construction is a leading construction company with a positive, proactive and solution-based approach to clients' needs. The company has a stellar reputation for undertaking complex and high specification projects from inception to completion. The Dungannon-based firm's portfolio includes projects in the commercial, education, health, industrial, residential, social housing and sport and leisure sectors. With a high proportion of long serving skilled craftspeople, the company also undertakes many specialist projects in the heritage sector. On March 28, 2022, QMAC Construction celebrated 25 years since the business was established. Peter and Rhona Quinn set up the company and have seen the business grow during that time, overcoming many challenges along the way. Peter Quinn, Operations Director, commented, "Since the business was set up, we are proud to say that the

company has been appointed to work on many landmark projects, including, for example, the delicate restoration work at both Enniskillen Castle and the award-winning St. Patrick's Church in Donaghmore. "Like every progressive company, our most valuable asset is our people; we have many long-serving staff including specialist tradespeople as well as project-management and support staff who all contribute to turning ideas and concepts from drawings into reality. We are indebted to them along with our skilled supply chain." In recent years, QMAC Construction has put a renewed focus on two areas of the business - further improvement in its health and safety management systems, as well as reviewing quality management in all areas of the business. The next focus is equality, diversity and inclusion throughout the company as part of a wider objective to help make

the construction industry more open and welcoming and be an industry of choice for young people contemplating career options. Rhona Quinn, Managing Director, is proud of what the team has achieved. "The past 25 years has been challenging for everyone in the industry," she said. "The past few years have been particularly difficult; however, we are looking forward to a return to a normal trading environment and are committed to building on the success that we have had to date."
